The date of these Final Terms is 24th October, 2012

These Final Terms, under which the bonds described herein (the **Bonds**) are issued, are supplemental to, and should be read in conjunction with, the offering circular (the **Offering Circular**) dated 22nd September, 2010 issued in relation to the debt issuance programme of European Investment Bank (**EIB**). Terms defined in the Offering Circular have the same meaning in these Final Terms. The Bonds will be issued on the terms of these Final Terms read together with the Offering Circular.

EIB accepts responsibility for the information contained in these Final Terms which, when read together with the Offering Circular, contain all information that is material in the context of the issue of the Bonds.

These Final Terms do not constitute an offer of, or an invitation by or on behalf of anyone to subscribe or purchase any of, the Bonds.

EIB confirms that its shareholders, the 27 EU member states, have recommended increasing the fully paid-in capital of EIB by EUR 10 billion. Enhancing and strengthening the capital base of Europe's long-term lending institution will allow a significant increase in funding to projects that support jobs and growth in the European Union.

The Board of Governors of EIB will decide and determine technical arrangements for the capital increase allowing for additional activities which will be fully paid-in. The additional capital to be paid-in by each shareholder will reflect their current shareholding.

The new fully paid-in capital increase will allow EIB to provide up to EUR 60 billion in additional long-term lending for economically viable projects within the European Union over the next few years. This will target four priority sectors where access to finance has been most difficult and where EIB financing will unlock additional private sector funding to maximise growth and job creation. The additional lending will be dedicated to supporting innovation and skills, SMEs, clean energy and modern infrastructure across the EU. The new financing would target regions and sectors in all Member States, in particular where investment could be rapidly unlocked, and be blended with EU funds. This would be in addition to the EUR 50 billion EIB lending a year already planned.

EU member states have also asked EIB to develop project bonds to improve financing for major infrastructure projects that will stimulate economic growth and job creation. This initiative is expected to be launched shortly, firstly through pilot projects, and will be jointly supported by European Commission funds. Existing initiatives that combine EIB loans and European Commission grants will be developed further, and new operations launched, to support innovation, small businesses and infrastructure. This will enable greater EIB engagement to support more challenging projects and increase the added value of long-term lending, without diminishing EIB's financial strength.
