and advances	0	0	

### (i) Rescheduled loans

	As at			
	30 June 2025		31 Decei	mber 2024
		Percentage of total loans & advances to		Percentage of total loans & advances to
Rescheduled loans and advances to customers, excluding those which have been overdue for more than 3 months and net of those disclosed in	HK\$,000	customers	HK\$,000	customers
subsection (i)	0	0%	0	0%

### g. Repossessed assets

There was no repossessed asset as at 30 June 2025 and 31 December 2024.

### 4 Off-balance sheet exposures information

The following is a summary of the contractual amounts of each significant class of off-balance sheet exposure information:

	As at		
	30 June 2025	31 December 2024	
	HK\$,000	HK\$,000	
<b>Contingent Liabilities and Commitments</b>			
Direct credit substitutes	0	0	
Transaction-related contingencies	0	0	
Trade-related contingencies	23,861	20,885	
Other commitments	546,376	557,325	
	570,237	578,210	
		1	
Derivatives			
Exchange rate contracts	0	0	
Replacement cost of derivatives			
Exchange rate contracts	0	0	

For contingent liabilities and commitments, the contract amounts represents the amount at risk should the contract be drawn upon and the client defaults. The notional amounts of derivatives indicate the nominal value of transactions outstanding at the balance sheet date. They do not represent amounts at risk.

The replacement cost of derivatives does not take into account the effects of bilateral netting arrangements.

Net long/(short) position	11	0	17	(4)	24

There was no structural position as at 30 June 2025 and 31 December 2024.

### 7 Liquidity risk management Average liquidity maintenance ratio

	For the quarter ended 30/06/2025	For the quarter ended 30/06/2024
Average liquidity maintenance ratio for the period	92.75%	95.70%

The average liquidity maintenance ratio is the arithmetic mean of each calendar month's average liquidity maintenance ratio for the relevant period as calculated in accordance with Section 103B of Banking (Disclosure) Rules.

### (a) Governance of liquidity risk management

The branch manages our liquidity risk in accordance with the Liquidity Risk Management Policy, which is set by Liquidity Risk Management Committee in Hong Kong branch and approved by our Head Office's Assets and Liabilities Committee. The Policy provides a set of principles for the prudent management of liquidity in the normal course of business. The primary measures used to manage liquidity within the tolerance are the stress-testing and scenario analysis, liquidity maintenance ratio, loan-to-deposit and cash flow maturity mismatch analysis.

Liquidity Risk Management Committee is responsible for the liquidity risk management in our branch. Chief Executive is the chairman of the Committee. The members include the head and staff of treasury department, risk management department and accounting department. Chief Executive could also invite other department heads or staff to attend the Committee meeting in need. The regular Committee meeting will be convened monthly or on a need basis. The branch regularly prepares various liquidity risk measurement indicators and limits, and reports to the Liquidity Risk Management Committee. Then, the Committee will report to the senior management of the Head Office to let the high-level management understands the branch's funding liquidity.

### (b) Funding strategy

The liquidity risk management of the branch adopts the principle of conservative and stable, forecasts the cash flow at different time points to diversify the source and duration of funds, and adjusts the liquidity gap for daily cash flow and market changes.

- 1. Source of funds: Based on the principle of diversification, stability and reliability.
- 2. Use of funds: The principle of decentralization and avoiding excessive concentration.
- 3. Management strategy: Based on the principle of conservative estimation, and strengthen the interactive management of foreign currency funds.

### (c) Liquidity risk mitigation techniques

In order to maintain a stable liquidity ratio, the branch establishes several measures to reduce the liquidity risk when branch's capital is needed in emergency.

The measures are included by following:

- 1. Intra Day Repo
- 2. Sale of debt securities
- 3. Funding from Head Office
- 4. Funding from other banks
- 5. Reduction of inter-bank lending activities

### (d) Liquidity stress tests

Stress tests should be performed quarterly for all currencies in aggregate and separately for positions in HKD, USD, CNY that we have significant positions in order to maintain appropriate individual currency funding in needs. The liquidity stress test is carried out by the Risk Management Department. There are 3 scenarios for stress testing. They are institution-specific stress scenario, general market stress scenario, and combination of both situations. Each scenario would perform cash-flow analysis for within 7 days or within 30 days. The stress result is used to analyzing exposure level and risk tolerance in such scenarios. The Risk Management Department also should review the assumptions and results of the stress testing periodically, as well as to adjust the different assumptions to ensure those assumptions for stress testing which are the most suitable for our branch.

### (e) Liquidity buffers and contingency funding plan

Our policy set a higher internal limit of liquidity maintenance ratio than the statutory minimum to maintain adequate liquidity in response possible situation. In addition, the branch establishes a contingency funding plan that details the emergency measures which should be taken actions while a liquidity crisis occurs. The Liquidity Risk Management Committee shall formulate measures to address the emergency situation and report to the Head Office regarding the follow-up actions and results.

### (f) Measure indicators of liqudity risk

The branch sets up a series of limits indicators, including liquidity maintenance ratio, maturity mismatch limits, loan to deposit ratio, loss of deposit and group liquidity limits, in order to monitoring impact on liquidity risk.

Limits in	Limit	
Liquidity maintenance ratio	)	≥35%
Maturity mismatch limits	Within 1 month	-20%
Loan to deposit ratio	Overall	200%

### (g) Concentration limits on collateral pools and sources of funding

The branch holds HKD 155 million qualified bonds as collateral for Intra Day Repo Facility. The major sources of funding for the branch are the funding raised from Head Office and inter-banks. The group has established concentration limit of funding sources taking into account the respective risk profiles of the bank. Intra-group funding and funding from the largest funding provider are restricted to be not more than 35% of the total funding sources to reduce reliance on a single source of funding. The composition of the major funding sources as at 30 June 2025 is shown below:

彰化銀行

香港分行

(HK\$'000)

Significant	Total	As % of	Breakdown of total amount by remaining term to maturity					
funding instruments	amount	total liabilities	Up to 1 month	2-3 months	4-6 months	7-12 months	Exceed 12 months	
Deposits from retail customers	3,886,817	20.29%	1,423,773	1,458,618	563,252	441,174	0	
Deposits from other non-bank customers	6,263,633	32.70%	2,250,111	2,610,787	602,572	800,163	0	
Funding raised from banks	7,562,561	39.48%	2,844,129	4,481,436	236,996	0	0	

### (h) Liquidity exposures and funding

Liquidity maintenance ratio (LMR) is the regulatory indicator for liquidity exposure of the branch. The LMR is computed by its own liquefiable assets and qualifying liabilities. The information on LMR as at 30 June 2025 and 30 June 2024 is shown below:

(HK\$'000)

	30 Jun 2025	30 Jun 2024
	Weighted amount	Weighted amount
Liquefiable assets	6,281,795	5,751,156
Qualifying liabilities (after deductions)	3,549,694	5,343,884
Liquidity Maintenance Ratio (month-end) (%)	176.97%	107.62%

### (i) On- and off-balance sheet items as of 30 June 2025 for the Branch are listed as below:
